बैत क्यो होने जा रहा है?

- जलवायु परिवर्तन के कारण बिगड़ता पर्यावरण विश्व के लिए सबसे बड़ी चिंता का विषय है. ऐसे में प्लास्टिक से पैदा होने वाले प्रदूषण को रोकना एक बहुत बड़ी समस्या बनकर उभरी है. प्रत्येक साल कई लाख टन प्लास्टिक उत्पादन हो रहा है, जो कि मिट्टी में नहीं घुलता-मिलता (Biodegradable) है. इसलिए विश्व भर के देश सिंगल-यूज प्लास्टिक के इस्तेमाल को समाप्त करने हेतु कठोर रणनीति बना रहे हैं.
- सिंगल यूज प्लास्टिक करीब 7.5 प्रतिशत की ही रीसाइक्लिंग हो पाती है. बाकी प्लास्टिक मिट्टी में मिल जाता है, जो पानी की सहायता से समुद्र में पहुँचता है और वहाँ के जीवों को काफी नुकसान पहुँचाता है. अधिकांश प्लास्टिक कुछ समय में टूटकर जहरीले रसायन भी छोड़ते हैं. ये रसायन पानी और खाद्य सार्वजनिक के द्वारा हमारे शरीर में पहुँचते हैं और काफी नुकसान पहुँचाते हैं.
