

Vision, Mission and Key Objectives

Vision

- To protect and promote human health by assuring high quality of Biologicals.
- To elevate NIB as a world class Regulatory and Research Laboratory.

Mission

The mission of the institute is to:

- Set up irrefutable standards of regulating and testing immunodiagnostic kits, vaccines, blood product and reagents.
- Develop as a centre of excellence in academic pursuits and R & D projects to foresee and pioneer future trends in the field of biologicals.
- Minimize use of animals in testing.
- Promote India as a hub of Biologicals industry and establish an international collaborative network.

Key Objectives (Mandate)

- To develop and validate standards for quality control testing procedures for biologicals and immunobiological products.
- To develop linkages with other National / International Institutions and keep abreast with worldwide scientific research and technological developments in production and quality control of biologicals and immunobiologicals with a view to advising on the suitability of their adoption.
- To provide training facilities in quality control for personnel of related Institutions including Testing and Manufacturing units.
- To assess from time to time the availability of qualified manpower to meet the needs of quality control and manufacture of biologicals and immunobiologicals so as to advise the Government on appropriate measures and the scope of upgrading existing testing facilities in the country.
- To implement and co-ordinate activities of Haemovigilance Programme of India.
